

Tom Chadwick
Laingsburg, Michigan

"This was my first year to plant Vistive™ low-linolenic beans – and they were 100% of my beans. They yielded an average of 50+ bushels per acre, which was comparable to the non-Vistive beans of neighboring farms. I was very happy and will be doubling my Vistive acres next year. The yields are wonderful, and it's pretty exciting to be back into soybeans for this farming operation."
